Unknown 17 comments. Acute head injury result from a

trauma to the head leading to brain injury or bleeding

within the brain, It's can make edema and hypoxia. Head

injury cases is the leading cause of death in the first four

decades of life. A head injury also called Traumatic Brain

Injury (TBI)

Management of the paediatric patient with acute head

Head trauma leading to brain injury is an important cause

of morbidity and mortality in childhood. Injury severity is

related to the mechanism of trauma, which itself varies

with age. The vast majority of head trauma in paediatric

patients is mild, requires no specific therapy and leaves no

sequelae. However, it is important to identify
