Arc welding - Wikipedia

Arc welding is a welding process that is used to join metal to metal by using electricity to create enough heat to melt metal, and the melted metals when cool result in a binding of the metals.

PowerARC 200ST -Stick Welders | Everlast Welders Canada

For excellent low spatter arc performance on E7018, E7024, E7014 and even stainless class electrodes the unit has another connector port for all other welding rods. In both the 6010 and standard operating modes, the unit features auto adaptive hot start, and auto regulated arc force control, which allows you the amount of arc control you need. The basic DC Lift TIG capability of this unit also
