Chapter 17 - Component-based software engineering

Component-based development Component-based software engineering (CBSE) is an approach to software development that relies on the reuse of entities called software components .

Component-Based Software Engineering

Component-based Software Engineering is concerned with the rapid assembly and maintenance of component-based systems, where components and platforms have certified properties

Component-based software engineering

Component-based software engineering (CBSE) is an approach to software development that relies on software reuse. It emerged from the failure of object-oriented development to support effective reuse. Single object classes are too detailed and specific. Components are more abstract than object classes and can be considered to be stand-alone service providers. Ian Sommerville 2004 Software
