18.1 Close Binary Star Systems - ast.cam.ac.uk

18.1 Close Binary Star Systems It is thought that about half of the stars in the sky are in multiple systems, consisting of two or more stars in orbit about the common centre of mass. In most of these systems, the stars are sufficiently far apart that they have little impact on one another, and evolve independently of one another, except for the fact that they are bound to each other by gravity
