Heuristic Algorithms for Combinatorial Optimization
A heuristic algorithm is useful if it is 1 efficient it "costs" much less than an exact algorithm 2 effective it "frequently" provides a solution "close" to the right one

Combinatorial heuristic algorithms with ... - amazon.ca
This book contains combinatorial heuristic algorithms with computer programs in FORTRAN 77. Each of the following regarded problems has been shown to be NP-complete: integer linear programming, zero-one linear programming, zero-one knapsack problem, traveling salesman problem, Steiner tree problem, graph partitioning, k-center location.

Heuristic Algorithms for Combinatorial Optimization Problems

Goals: To give an introduction to the combinatorial optimization problems and heuristic techniques which can be used to solve them. A set of heuristic algorithms, including simulated annealing, tabu search, and genetic algorithms, together with their practical applications to system design and software engineering, will be discussed

Combinatorial Heuristic Algorithms with FORTRAN | Hang ...

In recent years researchers have spent much effort in developing efficient heuristic algorithms for solving the class of NP-complete problems which are widely believed to be inherently intractable from the computational point of view.

Title: Design, Evaluation and Analysis of Combinatorial ...

Abstract: Combinatorial optimization is widely applied in

a number of areas nowadays. Unfortunately, many combinatorial optimization problems are NP-hard which usually means that they are unsolvable in practice. However, it is often unnecessary to have an exact solution. In this case one may use heuristic approach to obtain a near-optimal solution in some reasonable time.

Using A Lagrangian Heuristic For A Combinatorial Auction ...

In this paper, a combinatorial auction problem is modeled as a NP-complete set packing problem and a Lagrangian relaxation based heuristic algorithm is proposed.
