This volume is based on the program of the Second International Conference on Drugs of Abuse, Immunity and AIDS, held in Clearwater Beach, FL in June 1992. **Aids, drugs of abuse and the immune system: A complex ...**

A large majority of people with AIDS have a well-established history of drug and alcohol abuse. Both drugs of abuse and alcohol have immunotoxic properties as evidenced by a number of studies. These include marked changes in the cellular, humoral and other components of the immune defense mechanism. Such a compromise of the immune system can render it susceptible to the development of AIDS.

**Drugs of abuse, immune modulation, and AIDS - ResearchGate**

Illicit drugs such as amphetamines, cocaine, marijuana, and opiates alter immune function and decrease host resistance to microbes in vitro and in experimental animal models.
