which lie between the equatorial rainforests and the deserts and semi-deserts of Africa, Australia and South America.

Savanna | ecological region | Britannica.com

Savanna: Savanna, vegetation type that grows under hot, seasonally dry climatic conditions and is characterized by an open tree canopy (i.e., scattered trees) above a continuous tall grass understory (the vegetation layer between the forest canopy and the ground). The largest areas of savanna are found in

Tropical Savanna Ecology | Charles Darwin University

We are a research group based at Charles Darwin University, in northern Australia. Our research broadly focuses on the sustainable management of tropical savanna landscapes. We explore how fire has shaped and maintains the biota of tropical savanna landscapes, and how contemporary fire regimes can best be managed for biodiversity conservation.
