old and those over 55.

What is Hodgkin lymphoma? - Canadian Cancer
Society

Hodgkin lymphoma (HL) is a cancer that starts in
lymphocytes. Lymphocytes are white blood cells of the
lymphatic system. The lymphatic system works with other
parts of your immune system to help your body fight
infection and disease.

What Causes Hodgkin Lymphoma? - American Cancer
Society

What Causes Hodgkin Lymphoma? Some researchers
think that infection with the Epstein-Barr virus sometimes
causes DNA changes in B lymphocytes. In some cases,
this leads to the development of Reed-Sternberg cells,
which are the cancer cells in HL. DNA is the chemical in
our cells that makes up our genes, which control how our
cells work. We look like our parents because they are the
source of

Prognosis and survival for Hodgkin lymphoma -
Canadian ...

Prognosis and survival for Hodgkin lymphoma If you have
Hodgkin lymphoma (HL), you may have questions about
your prognosis. A prognosis is the doctor's best estimate of
how cancer will affect someone and how it will respond to
treatment.

Causes | Lymphoma Canada

Lymphoma > Non-Hodgkin Lymphoma > Causes ; Causes
. The cause or causes of lymphoma are largely a mystery.
There may be some genetic predisposition, or it may be

caused by an environmental trigger such as pollution. There is not, however, sufficient evidence to provide a definitive answer. It has been shown that some NHLs of the digestive tract such as mucosa-associated lymphatic tissue (MALT)
