What Is a Package Unit | Frigidaire HVAC

A package unit is the all-in-one heating and cooling system for homes that don't have a lot of room indoors for either a furnace and coil, or an air handler.

[Packaged Systems](#) | [Shop Air Conditioner Systems](#) | [Trane](#)

The air conditioner packaged systems are a great option if you don't have a split system. These systems offer options for humidity control, so they're great for homes in warmer regions. These systems offer options for humidity control, so they're great for homes in warmer regions.

How a Packaged System Works | HVAC | Goodman

Packaged Gas-Electric: The heating component of a packaged gas-electric system is a gas furnace. The heating portion of the system uses natural gas or propane to combust inside the heat exchanger, creating heat. As cool air from the interior spaces is pulled in through the return ducting, the blower motor then blows the air over and through the hot heat exchanger, heating the air. The warm air
