What Is A Salt Water Pool? March 19, 2015 April 26,
2018 Matthew Simmons Most people hearing the words
salt water naturally think of ocean water, but in the world
of swimming pools, salt water or salt pool refers to one
that uses a salt chlorine generator for sanitization.

What many homeowners don't realize is a saltwater pool
still contains chlorinated water. You pour salt into your
pool; the salt goes through the generator, which produces
chlorine, says Chuck Burris, owner of Classic Pools
Lubbock in Lubbock, Texas.

Use a salt water test kit to determine the pool's current salt
level, then calculate how much salt you need based on the
pool's size in gallons with a salt table, subtracting the
current salt level (your generator manual should contain a
salt table).

A salt water pool relies on salt water, not chlorine to
maintain safe pool water. Technically, a salt water pool is
not chlorine free. Instead, the salt water system
automatically converts ordinary salt into chlorine, using
less of the harsh chemicals usually required to keep your
pool clean. With sensors to automatically generate and
introduce more chlorine when your pool water needs it,
salt systems require less maintenance, saving you time and
money.

A salt water pool is not a chlorine substitute - a salt water
pool is a chlorine pool. If you are thinking about going
with salt to reduce your chemical exposure you are barking
up the wrong tree. Whether you use chlorine pucks, liquid
chlorine, chlorinated unicorn tears or salt water chlorine
the end result is identical - a chlorine pool. If you want to
reduce your chemical exposure you need
