Analysis of correlated data is a hot topic in the nursing sciences, including topics such as the individual health trajectory, multilevel and hierarchical modeling, longitudinal data analysis, and latent variable modeling. Four articles touch on various aspects of these advanced statistical techniques. Hayat and Hedlin provide a nontechnical overview of this topic. Son et al. present an [Polit, Statistics and Data Analysis for Nursing Research ...](#)

The second edition of *Statistics and Data Analysis for Nursing*, uses a conversational style to teach students how to use statistical methods and procedures to analyze research findings.
