Robustness Analysis of Stochastic Biochemical Systems
In this paper, we propose a novel framework for robustness analysis of stochastic biochemical systems. To this end, inspected systems are described by means of stochastic biochemical kinetic models, system's functionality is defined by its logical properties, and system's perturbation is modelled as a change in stochastic kinetic parameters or initial conditions of the model.
Robustness Analysis of Stochastic Biochemical Systems PDF | We propose a new framework for rigorous robustness analysis of stochastic biochemical systems that is based on probabilistic model checking techniques. We adapt the general definition of
