The shoot system is above ground and includes the organs such as leaves, buds, stems, flowers (if the plant has any), and fruits (if the plant has any). The root system includes those parts of the plant below ground, such as the roots, tubers , and rhizomes .

Plant Structure - Science for Kids

The root system of a plant grows as the plant grows. The main root that comes out of the seed is the tap root or main root. It is connected to the stem of the plant and sends water and nourishment from the soil to the stem of the plant. The tap root gets lots of help from the lateral roots. The lateral roots also help to hold the plant in the ground. bio100.class.uic.edu
