#### Prediction of Delamination Migration at a 0 / Ply ...

The strain energy release rates in the direction of the fibers,  $G_f$ , and perpendicular to the fibers,  $G_m$ , were calculated, along with the total strain energy release rate,  $G_T$ . The components  $G_f$  and  $G_m$  were then used with the shear stress sign, to account for the effect of both parameters on delamination growth and migration. Correlation with experimental results for 0 /60 delamination
