Uncertain Data Envelopment Analysis - ScienceDirect  
Uncertain Data Envelopment Analysis. The reliability of a DMU's efficiency score is jeopardized if the data is erroneous, which points to a desire to accommodate suspect data within a DEA application. Uncertain data fits seamlessly into the paradigm of robust linear optimization, and our overarching model adapts this robust perspective.  
Uncertain Data Envelopment Analysis - ScienceDirect  
Data Envelopment Analysis (DEA) is a nonparametric, data driven method to conduct relative performance measurements among a set of decision making units (DMUs). Efficiency scores are computed based on assessing input and output data for each DMU by means of linear programming.
